Cambridge

My dear Guillemin,

I was glad to hear that probably Wyart and yourself will be representing France at the Madrid meeting - we shall have plenty of time for discussions, and I hope that you will be able to take part also in the excursions. I regret having forgotten to enclose the draft programme - it will probably be another week before you receive the official one.

Would you be willing to accept nomination as Secretary of the proposed Committee on Nomenclature and New Minerals? I should like to suggest this to the Provisional Committee; we ought to have general agreement on such matters before Madrid, as far as possible.

Thank you for looking into the matter of the last issue of the Bulletin for me. I shall let you know later the exact time of my arrival in Paris at the end of March.

Sincerely,

Norman Henry

Cambridge

My dear Guillemin,

I should have written to you previously to thank you for the very pleasant evening I spent at your house during my short visit to Paris some weeks ago. Claringbull has, unfortunately, had much family illness and has been partly 'out-of-action'. But we have now got a draft programme, and Amorós will send this out within a week. I am sending copies of the draft, to show you what is proposed, to MM. Orcel and Wyart as well as to yourself. (I think that the former would appreciate being kept fully in touch with developments.) I shall be writing again very soon to discuss suitable people for speakers, chairmen and members of committees, etc. I feel that we shall have a good meeting and that it will be an important occasion. Our Society is sending Tilley, Claringbull and myself as delegates and we know also of the following delegates: Buerger, Berry, Sahama, Laves, Parker, Onorato, Ito. I do hope to meet you there. I expect to be in Paris on the 28th of March so perhaps we can have a talk then.

I have also sent the Abstracts document to MM Orcel and Wyart, and this matter will be discussed in Madrid; this document is going out to many countries.

Sincerely

Norman Henry
